

Apple bird feeder

You will need:

- 2 cups of birdseed
- 2/3 cup of water
- 2 packets of unflavoured gelatine
- 2 apples
- String
- 4 Screws

Directions - ask adults for help

- Bring water to a boil
- Add the gelatine and stir until completely dissolved
- Cut the apples in half lengthwise and hollow out the insides with a spoon
- Fill each apple with birdseed mixture
- Put in the fridge for 2 hours
- Poke a screw into the top of each apple
- Tie a piece of string to the screw
- Hang the apples outside for the birds to eat
